

ACT

FLIR's Multilayered Security solutions deliver strategic protection which mitigates risks, and enhances business continuity by reducing vulnerabilities and improving overall security effectiveness.

By implementing **multilayered** security, teams can **detect threats earlier, assess /identify intrusion better, coordinate information, and respond stronger.**

Creating multiple defence and insight points against attacks, a multilayered security strategy also ensures redundancy so that that even if one layer is compromised, other layers remain to mitigate, and respond to threat.

ACT with the **FLIR Security Advantage**

Assess

- Greater site coverage
- Increased deterrence and risk mitigation
- Reduced false alarms and increased response confidence
- Increased detection accuracy

Communication:

- Real-time data sharing
- Clearer threat localisation

Take Action

- Rapid decision-making enabling faster response to incidents
- Reduced security gaps by ensuring greater and more precise coverage

FLIR Multilayered security supporting your competitive advantage:

- Safer more secure facilities and operations
- Reduced total cost of ownership
- Enhanced regulatory compliance and reputational resilience
